To Government of Brazil

I am writing to you because about the Amazon. As you can see the photos a good bit of the Amazon is dead because of you. In fact the Amazon is not only its animals that live there not us.

I feel that the Amazon is a home to millions of species of animals. It is certain that animals are dying because of you. Also a lot of animals are dying.

Global warming is happening because of you. What have you got to say for yourself? Stop cutting trees down and we will cut the temperature down.

Without a doubt if you stop cutting trees down global warming will stop.

If this is you stop cutting I will give you hundred million. If not you will pay me millions money.

We need to make a deal do you or do you not think its okay to stay cutting down trees? Yes or no

I have a question

Do you like cutting down trees?

Do you want to do it? Yes or no

Do you have to do it?

Do why why do you do it?

Yes or no
